STEP BY STEP, THE IDENTITY OF THE LOMBARD CLUSTER

Who we are

The Lombard Life Sciences Cluster is **the regional community that brings together all public and private organisations** - research, industrial and clinical - which work with expertise and enthusiasm to improve the lives of all citizens.

What we do

The Lombard Life Sciences Cluster **promotes** interaction and exchange between members; **supports** them in the implementation of shared projects; **communicates** with regional, national and foreign institutions; **facilitates** the creation of new partnerships, even internationally; **optimises** technology transfer processes and encourages the creation of new businesses; **identifies and anticipates** national and international strategic trends; **encourages** the growth of local skills and resources, fuelling the evolution of the regional system and expediting access to all infrastructures.

How we help the community

Facilitated by their membership of the Cluster, the activity of all members **generates innovation** in the life sciences.

CLUSTER SECTORS, WHEN SCIENCE HELPS LIFE

The Cluster unites and connects all public and private players active in the health supply chain to promote progress in life sciences in Lombardy.

PHARMACEUTICAL

WELLNESS

CLUSTER MEMBERS, PUBLIC AND PRIVATE WORKING TOGETHER

Each member of the Cluster can count on a structure that provides tangible support, knowing they belong to a community that shares their values and with which they are constantly connected.

Research Institutes

- Universities
- Public research bodies and centres
- Private research institutions and centres

Clinics

- Public and private Scientific Institutes for Research, Hospitalisation and Healthcare
- Hospitals and Local Public Health Authorities, outpatient, hospitalisation and care facilities
- Nursing Homes and ASPs

Associations

- Professional Associations
- Local Associations

Businesses

- Large enterprises
- SMEs
- Start-ups

CREATING A CONTINUOUSLY EVOLVING ECOSYSTEM TOGETHER

From the science community

to the public community

of the Lombardy Region

in the heart of Europe

Our aim

To engage every resource so that the Cluster community contributes to creating a virtuous ecosystem, an expression of that public-private collaboration that makes the **Lombardy region a hub of excellence** for research and innovation.

Our commitment

To be available to every organisation committed to generating innovation in the life sciences, fostering connections and synergies to ensure the constant improvement of mutual activities and business opportunities.

LIFE SCIENCES, AN INTENSELY INNOVATIVE SECTOR IN WHICH TO CONTINUE INVESTING

An interconnected ecosystem where public and private form part of an integrated supply chain.

Excellence in training and research: universities, research institutions, IRCCSs, networks, social and healthcare structures, clinical trials.

Two new dedicated centres: MIND created around the Human Technopole and Città della Salute.

A highly innovative production system based on a robust manufacturing tradition with a strong international outlook.

**Every day we improve
people's quality of life.**
